MSRP: \$1,199

Your Price: \$999 with free shipping

MSRP: \$1,268

Your Price: \$1,068 with free shipping

Features

- More reliable than image recognition. The robot can't lose you even if there are several people in the action area. Whatever the light conditions and even in the dark, the robot always follows you.
- No problem with colors or shapes of the tracked subject.
- PIXEM2 uses a radio triangulation technology that positions the watch 10 times per second, even better than GPS.
- Place the three small beacons around your playground, turn everything on, and let's go! (* beacons are placed between 1 and 2m high)
- Distance of **330ft/100 meters**

Automatic Zoom

- Choose the size of the frame (e.g. 4m on each side of you), and the zoom will keep that when you move away from or closer to the robot.
- This automatic zoom works for PIXEM2 with **a cameras as well as smartphone/tablets.**
