ANT MEDIA SERVER

Scalable, Ultra Low Latency and Adaptive WebRTC Streaming
Ant Media Server supports WebRTC, CMAF, DASH, HLS, RTMP, RTSP, SRT and Zixi.

Build Your Own Live Stream

Ultra Low Latency Streaming
Increase interaction and experience real-time video streaming. Ant Media Server WebRTC Streaming Solutions provide less than 0.5 seconds latency

Adaptive Bitrate Streaming (ABR)
Reach a broader audience with Adaptive Bitrate Streaming. Adaptive Bitrate makes it possible to play real-time streams on every screen at any internet speed.

Auto-Scalable Live Streaming
Effortlessly scale with auto-scalable cluster for thousands of publishers and viewers. Achieve sub-0.5s latency, support WebRTC, CMAF, DASH, HLS, RTMP, RTSP, SRT, and Zixi.
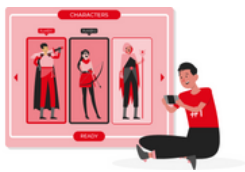

Live Video Surveillance
Embed IP camera streams into websites and mobile apps to broadcast video. AMS is compatible with ONVIF IP cameras with PTZ and Auto Discovery features.

Free WebRTC Live Streaming SDKs
Build your own Video Streaming Application with Ant Media Server WebRTC SDKs for iOS, Android, Unity, React Native, Flutter and JavaScript.

What can Ant Media Server be applied to?

Media and Entertainment
Experience Real-Time Interaction with Ultra Low Latency Streaming.

Live Video Monitoring and Surveillance
Monitor IP cameras with Ultra Low Latency on Web browser using fastest-growing WebRTC server.

Video Conferencing / Webinar / E-Learning
Increase interaction and experience real-time video streaming using Ant Media Server WebRTC streaming Solutions.
